### **DETAILED ACTION**

**The remarks the RCE filed 02/04/09 are duly noted.**

#### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the bag, wrapping paper and ribbon material must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 15 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Hara (US Patent 5,565,845).

The device of Hara reads on the limitations of the claimed invention including a bag packaging means (1), a detection means (5; col. 4, line 5), a microprocessor means (30; col. 6, par. 2) and sense detectible signal generating means (col. 6, line 25). Hara further teaches signal can be a sound and/or light in col. 6, line 67-col. 7, line 3).

Claims 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Hsieh (US Patent 5,123,192).

The device of Hsieh teaches the elements of the claimed invention a packaging box (c), a detector (3), a microprocessor (22) and a signal generator (col. 2, ll. 42-48). Further, the sensor of Hsieh senses motion as disclosed in col. 2, ll. 43-45.
